

Polycarbonate Covers

STI-7700

STI-7730

PRODUCT OVERVIEW

These clear, tamperproof, tough polycarbonate tough covers offer an excellent way to help prevent vandalism and tampering to larger keypads, access controls, volume and lighting controls, and similar devices. Moulded of clear polycarbonate (extremely difficult to break), each protected unit can be clearly seen and quickly identified. Covers increase the life and reliability of units by protecting them from accidental or intentional damage. Models available with strong piano style hinge, with the choice of open spacer or enclosed spacer, with or without a lock.

HOW IT WORKS

All the protectors come complete with installation fixings and are easily installed. For additional security the covers can be supplied with a lock.

KEY FEATURES

General Information

- Tough, clear polycarbonate covers that help to extend the life and reliability of digital keyboards, access controls and security panels.
- Three year guarantee against breakage of polycarbonate in normal use.

Design

- Protects keypads, access controls and double sockets from misuse.

Construction

- Tough polycarbonate housing can withstand the severest of knocks.

Installation

- A simple 4 fixing installation can retrofit over existing device.
- Can accommodate flush mounted applications.
- Comes complete with mounting hardware.
- Typical working properties of polycarbonate are -40°C to 121°C (-40° to 250°F)

Options

- Lock facilities are available.
- Certain models are available in a smoke finish polycarbonate.
